FINDINGS-RECOMMENDATIONS

Briefly summarize the investigation describing your efforts to prove or disprove the allegation(s). Indicate whether witnesses or evidence support or do not support the allegation(s).

In sustained cases ONLY, copies of the accused member's Summary of Previous Disciplinary Actions and Record of Previous Compliment-

ary History will be included as attachments.

Investigation reveals that based on Medical Services Section records reviewed by Administrator Barbara Hemmerling and which were the basis for the original complaint, forty (40) seperate incidents were noted as being possibl Medical Roll Abuse. Of those forty (40) only eight (8) allegations were formally lodged against the accused, based on the probability of sufficient evidence to make a determination regarding the validity of the allegations. The accused; during and subsequent to her formal statement of 06 Nov 96, provided evidence and a witness who could corroborate her assertion that the allegations were unfounded. The witness, Ms. Dona Kowalkowski, during the course of her interview of 11 Dec 96, was able to provide documentation from the official Medical Services Section file of the accused which proves that medical documentation from the medical provider of the accused was submitted for the dates in question, although in some instances these documents were not tendered to MSS on or directly after the alleged infraction. There is evidence that supports the allegations that the accused failed to either report to or call the MSS on the dates she was ordered. There is no way to properly determine the validity of the documents, the actual date they were prepared or their real origin, which would be beyond the investigative pervue and scope of the undersigned. Several of the aforementioned documents were written to cover a time period of approximately four (4) months, but were all allegedly written by the care provider as much as thirty (30) days before the date in question and were all allegedly written within one (1) day of each other.
